Trick or Treat Tens and ones

a game for 2 players
Need: 2 different colored pencils

Each player uses a different colored pencil. Players take turns to choose a number on the board and tell how many tens and ones make the number, e.g. for 78, say 7 tens and 8 ones. The player then colors that number with their pencil. The first player to color four in a line is the winner. The line can go across, down or diagonally.
